Introduction

The following study has been prepared for the Mayor and Council of the Town of Westfield to determine whether properties located within the Town's special improvement district, qualify as an "area in need of rehabilitation" in accordance with the New Jersey Local Redevelopment and Housing Law (LRHL) at N.J.S.A. 40A:12A.

This report begins with a brief description of the redevelopment process, to help familiarize the reader with the steps involved in designation of areas in need of rehabilitation and what criteria are utilized to determine if properties can be designated as such. A designation of an area in need of rehabilitation allows a municipality to utilize the powers of the LRHL for areas in need of rehabilitation, which may include certain financial incentives such as those found in the Five-Year Tax Exemption and Abatement Law. The power of condemnation or to grant long-term tax exemptions are not permitted for properties within areas in need of rehabilitation. Those two powers are exclusive to properties designated as areas in need of redevelopment.

This report also includes a description of the study area, and a review of the Town Master Plan and Land Use Ordinance. An analysis of the study area is then included which describes how the study area meets the statutory criteria for designation as an area in need of rehabilitation in accordance with the LRHL.

Finally, an outline of recommended next steps is included to help guide the Planning Board and Governing Body.

The Local Redevelopment and Housing Law

Areas in Need of Rehabilitation

The LRHL enables local governments to initiate a process by which properties which meet certain criteria contained within the statute may be designated as an area in need of rehabilitation. When properties are designated an area in need of rehabilitation, municipalities then have the option of adopting a redevelopment plan for all or a portion of the designated area establishing specific and detailed development standards, reflective of community desires for improvement of the area. Designation of an area in need of rehabilitation also allows a municipality to utilize the powers contained within The Five-Year Tax Exemption and Abatement Law to promote the construction and rehabilitation of structures within the area.

The LRHL specifies the process which must be followed in designating a rehabilitation area. A summary of that process is as follows:

Responsible Party	Designating an Area in Need of Rehabilitation
Governing Body	The Governing Body prepares a proposed resolution with any supporting report attached, which would declare identified properties as an area in need of rehabilitation and refers that proposed resolution and any report attached to the Planning Board for its review.
Planning Board	Within 45 days of the receipt of the proposed resolution, the Planning Board submits its recommendations, including any modifications recommended, to the governing body for its consideration. The Governing Body is not bound by the Planning Board's recommendations and may adopt the resolution with or without modifications. If the Planning Board does not submit recommendations within 45 days, the Governing Body may adopt the resolution with or without modification.
Governing Body	The Governing Body adopts the proposed resolution, with or without modification, designating the proposed area as an area in need of rehabilitation.

The Statutory Criteria Necessary to be Present for a An Area in Need of Rehabilitation Determination

A delineated area may be determined to be in need of rehabilitation if the governing body of the municipality determines by resolution that a program of rehabilitation, as defined in section 3 of P.L.1992, c.79 (C.40A:12A-3), may be expected to prevent further deterioration and promote the overall development of the community.

Section 14 of the LRHL lists criteria which are used to determine if properties can be designated as an area in need of rehabilitation. At least one of the conditions described in the criteria must be present. The criteria are as follows:

What is "rehabilitation" as defined in the LRHL?

Rehabilitation is defined within the LRHL as, "an undertaking, by means of extensive repair, reconstruction or renovation of existing structures, with or without the introduction of new construction or the enlargement of existing structures, in any area determined to be in need of rehabilitation or redevelopment, to eliminate substandard structural or housing conditions and arrest the deterioration of that area."

Criteria Identification	Description
1	A significant portion of structures therein are in a deteriorated or substandard condition
2	More than half of the housing stock in the delineated area is at least 50 years old
3	There is a pattern of vacancy, abandonment or underutilization of properties in the area
4	There is a persistent arrearage of property tax payments on properties in the area
5	Environmental contamination is discouraging improvements and investment in properties in the area
6	A majority of the water and sewer infrastructure in the delineated area is at least 50 years old and is in need of repair or substantial maintenance

Also, under the provisions contained within the LRHL, “where warranted by consideration of the overall conditions and requirements of the community, a finding of need for rehabilitation may extend to the entire area of a municipality.”

Study Area Overview and Location

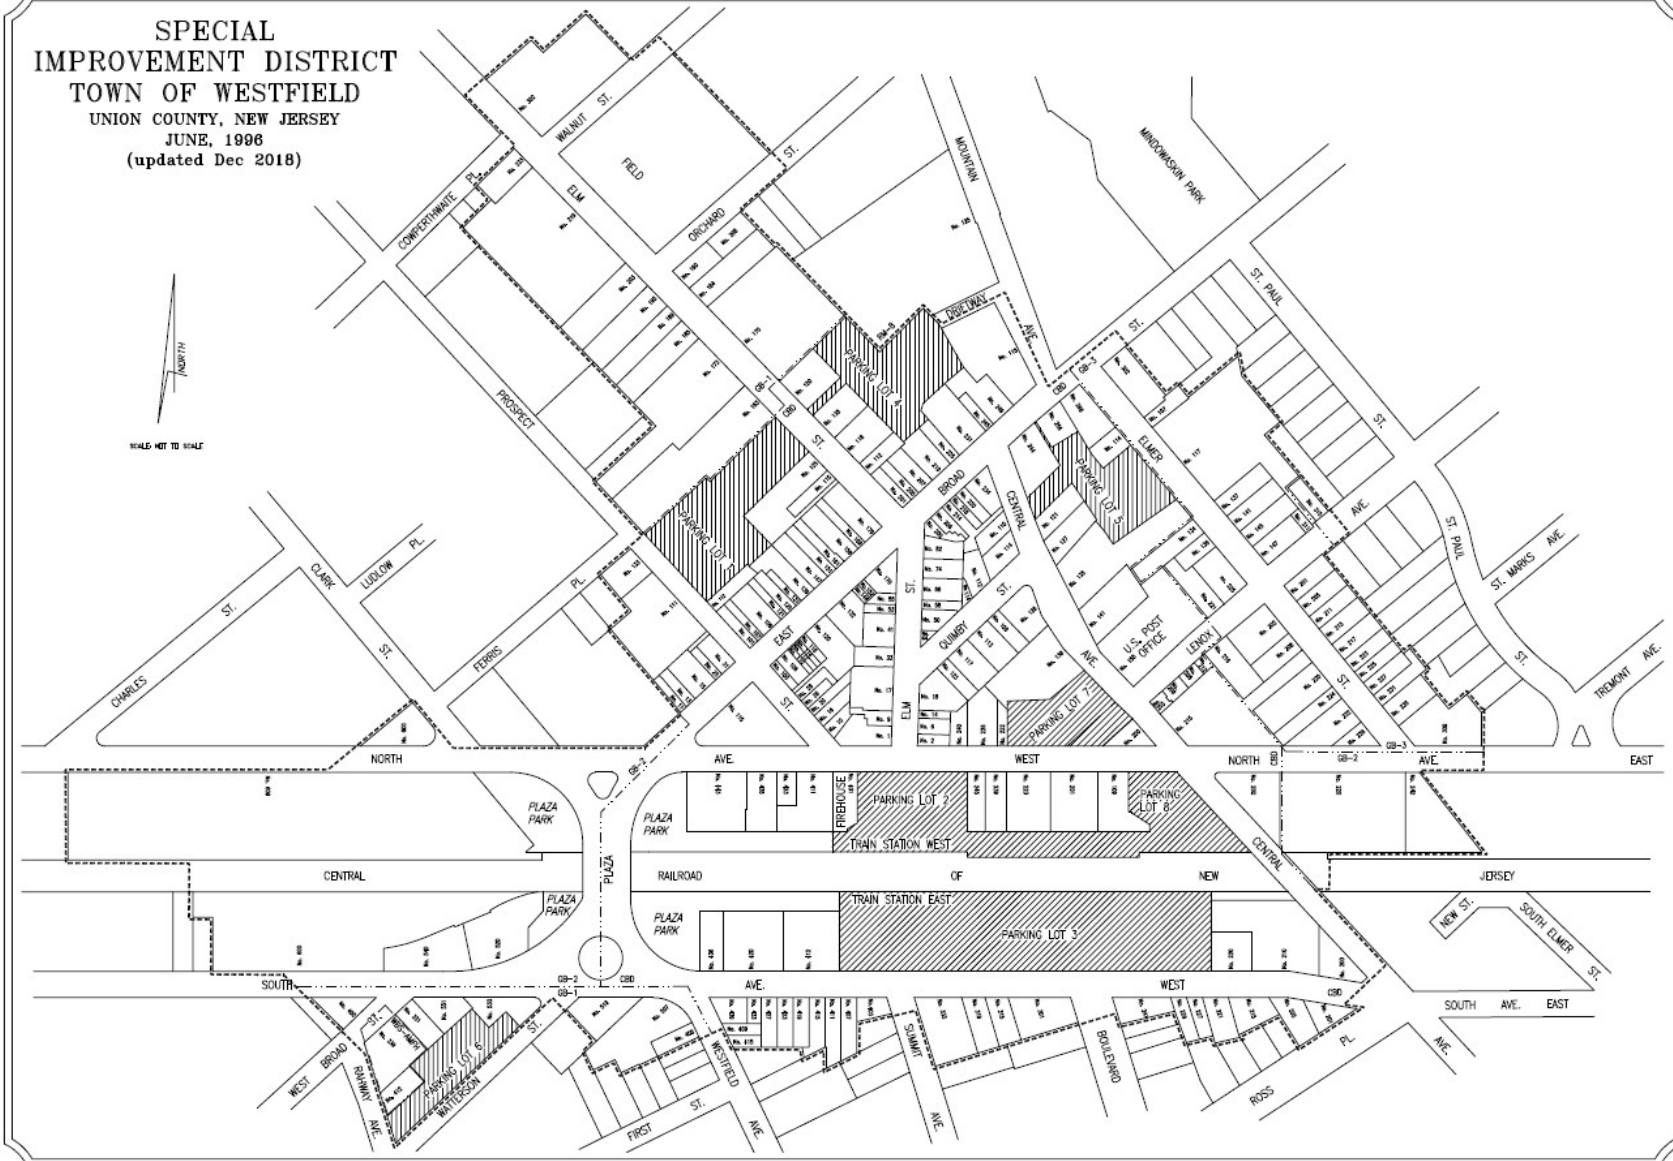

The study area boundary is the same as the Town’s special improvement district, including all properties

within that district. A map of the study area is presented on the following page. A list of all study area properties is included as an appendix to this study document.

The special improvement district was created by General Ordinance Number 1675, adopted on June 25, 1996. The ordinance includes declarations that the Town Council “regards the Central Business District as an integral and vital economic and social force in the Town of Westfield”, and “the continued vitality of the Westfield Central Business District is important to the entire community”.

The study area is located at what can be considered the geographic center of the Town of Westfield. At its core lies the Westfield Train Station, the station stop with the highest ridership along NJ Transit’s Raritan Valley Line. The area represents the economic heart of the community. It is clearly a focal point in Town as it contains over 400 commercial enterprises including a hotel, the Westfield Train Station, stops for local and regional bus service, and public areas. The area contains a number of Town-owned surface parking lots spread throughout, some of which serve users of the train and bus stops. The rail line also physically divides the area separating it into a “north side” and “south side”.

**SPECIAL
IMPROVEMENT DISTRICT**
TOWN OF WESTFIELD
UNION COUNTY, NEW JERSEY
JUNE, 1998
(updated Dec 2018)

Zoning and Master Plan Considerations for the Study Area

Study area properties are located in multiple zoning districts. These include the CBD Central Business District; GB-1-General Business District, GB-2 General Business District; GB-3 General Business District; RM-8 Single-Family and Two-Family Residence District; and, WBS-AMFH West Broad Street Affordable Multi-Family Housing Transit Oriented Development District. Certain study area properties are also located within the PA-AHO Affordable Housing Overlay District, and GB2-AHO Affordable Housing Overlay District.

The CBD and GB zone districts are developed primarily with retail, service, and other business uses that are permitted by the zoning ordinance. Of these four districts, only the GB-2 does not permit residential use in any form.

The 2002 Master Plan notes that the CBD zone district has historically been the heart of retail business in Westfield, due in part to its close proximity to the passenger railroad station and the compact, pedestrian-oriented shopping environment that exists. Residential uses are permitted above the ground floor of buildings in the district, where the ground floor as well as upper floors may be used for non-residential uses. The district contains a number of municipally-owned surface parking lots which serve businesses, residents, and commuters. The CBD also contains historic resources, including the Master Plan identified Downtown Historic District.

The character of development within the GB-1 zone district is very similar to that of the CBD zone, however, there is a lesser reliance on public parking as many of the lots within include private parking areas.

Within the GB-2 zone district, commercial development has occurred at a larger scale than in other districts which permit non-residential uses. For example, larger retailers such as Lord and Taylor are located within the zone. Also, residential use is not permitted within the GB-2, further defining its character.

Apart from the other GB zone districts, the GB-3 zone district was historically developed for residential use, but many of the homes have subsequently been converted to or replaced by residential development. The GB-3 zone district is the only GB district which permits exclusively residential development, along with mixed-use or 100% non-residential development.

Only two properties within the study area are located within the RM-8 zone district. These are developed with the Board of Education's administrative offices, and the Elm Street "property" which contains tennis courts and a multipurpose field. Both types of uses are permitted within the zone.

The PA-AHO is an affordable housing overlay zone district, currently under development with a 30 residential unit, mixed use project. This development falls partly within the study area. The GB2-AHO district allows for development of multi-family residential housing at 25 dwelling units per acre, or as an alternative, with uses

permitted by the underlying zone district. Both the PA-AHO and GB2-AHO districts were created as part of the Town's court-approved affordable housing plan.

Finally, the WBS-AMFH zone district is an inclusionary housing zone district, recently developed as part of the Town's affordable housing plan with a 31-unit multi-family residential building.

Westfield recently completed its Master Plan Reexamination Report. This document emphasizes the importance of downtown areas to a community. The Reexamination includes a series of recommendations in regard to economic development and land use which the community should follow. Included within these recommendations was the adoption of a new Master Plan goal "To address underutilized or vacant sites, encourage redevelopment or rehabilitation where properties meet those standards set forth in the Local Redevelopment and Housing Law". The Planning Board has held the required public hearing necessary to amend the Master Plan and has voted to amend the Town Master Plan to include this goal.

Condition of Water and Sewer Infrastructure

One of the primary factors in considering the designation of an area in need of rehabilitation is the age and condition of water and sewer infrastructure. Westfield is a mature suburban community that experienced its most intense period of development in the early half of the 20th Century. Its population grew from 6,420 in 1910 to

31,447 in 1960, an increase of 25,027 residents or over 380 percent. By comparison, Westfield's population in 2010 was 30,316, or a net decrease of 1,131 residents (or 3.6 percent) in the past 50 years. Thus, much of the Town's infrastructure was in place by 1960, including its water and sewer lines, according to a review of historic maps by the Town Engineer.

Today, the Town of Westfield owns and maintains the sewer mains located within the study area. The flows through this system are ultimately treated at the Rahway Valley Sewerage Authority treatment facility in Rahway. Due to the age of these lines, various problems have been detected which undermine the efficacy of the collection system. More specifically, the Town Engineer has indicated that there are ongoing problems with the sanitary sewers in the immediate area due to a buildup of grease in the lines. This issue requires constant maintenance by the Town's Public Works Department. Additionally, during rain events, the system becomes surcharged due to infiltration and inflow into the Town's aged and deteriorating lines in the street, leading to backups into the basements of several buildings within the Special Improvement District study area.

Potable water is supplied to Westfield by New Jersey American Water (NJAW). The water mains are owned by NJAW and were originally installed over 50 years ago. Based on information provided by NJAW, there has been no infrastructure replacement performed on this system since its original installation.

Conclusion and Recommendations

This analysis concludes that the Study Area qualifies as an area in need of rehabilitation under the criteria listed in the LRHL. Specifically, study area satisfies criteria 6 in that “a majority of the water and sewer infrastructure in the delineated area is at least 50 years old and is in need of repair or substantial maintenance”. The study area could benefit from a program of rehabilitation due to the age and condition of the water and sewer infrastructure. As noted earlier in this study, the LRHL allows an area to be designated as an area in need of rehabilitation on the basis of a single criteria, not all 6 criteria listed in the LRHL need be met.

A determination to designate a rehabilitation area is the first step in the redevelopment process for an area in need of rehabilitation. It is at its core, a delineation of an area in which a municipality intends to pursue an active role in furthering rehabilitation.

Next steps may include the drafting and adoption of a redevelopment plan for the area, although this is not mandatory. The Mayor and Council may choose to prepare any redevelopment plan itself, or delegate this task to the Town Planning Board. Any redevelopment plan drafted must be adopted by ordinance and include the required content specified in the LRHL.

The Town may also utilize the powers contained within the Five-Year Tax Exemption and Abatement Law in areas in need of rehabilitation without the adoption of a

redevelopment plan. In order to utilize this Law, Westfield must first adopt an authorizing ordinance which establishes application procedures and eligibility criteria. The exemptions and abatements permitted under the Five-Year Tax Exemption and Abatement Law may encourage private property owners to rehabilitate and reinvest in their properties.
